

How to upload and link files (like exercises or student assignments) to Clilstore.

Login and then create a unit in Clilstore and click “Publish”

Leave the unit and test it in Clilstore

Click the pencil icon to edit the unit

You can now see a new button labelled “Files...”

Click the button “Files...” and you come to a new option:

Click the button for “Choose the file on your computer”

Select the file you want to use in Clilstore and click “Open” (In Danish “Åbn”)

Manage files attached to Clilstore unit 2206

The unit currently has no attached files

Upload a new file

Choose the file on your computer ideer.docx
and the name it will have in Clilstore
something sensible for a computer file - See above.

Upload Remember that you must not upload copyrighted material

Then click "Upload" so the file is sent to Clilstore

Manage files attached to Clilstore unit 2206

Rename or delete existing files

File (you can edit its name here to change it) View Delete  

Save any name changes

Upload a new file

Choose the file on your computer Ingen fil valgt.

Upload Remember that you must not upload copyrighted material

The file has now been uploaded, you may now rename it if need be and then click "Save any name changes". You can also choose to delete the file

If you only needed one file such as a Word file (e.g. ideer.docx as used in this example") then the next step is:

Manage files attached to Clilstore unit 2206

Rename or delete existing files

File (you can edit its name here to change it) View Delete  

Save any name changes

Upload a new file

Choose the file on your computer Ingen fil valgt.

Upload Remember that you must not upload copyrighted material

Clilstore Unit 2206 Edit unit

Click the blue button labelled "Edit unit" below the upload file frame

Button text	WL New Link (url or Clilstore unit number)	
<input type="text"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="text"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="text"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="text"/>	<input type="checkbox"/>	<input type="checkbox"/>

Files... Upload and manage files attached to this unit...

You are now back to the edit page with the “Link buttons”

Button text	WL New Link (url or Clilstore unit number)	
Work Assignment	<input type="checkbox"/>	<input type="checkbox"/>
<input type="text"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="text"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="text"/>	<input type="checkbox"/>	<input type="checkbox"/>

Files... Upload and manage files attached to this unit...

Write a text in the “Button text” and in the white field next to that write “file:ideer.docx” or if you file was called “assignment.pdf” you should write “file:assignment.pdf”

Finally click “Save unit” and when you go to the unit you will see a button with your text which links to the file:

A demo of wireless electricity

ERIC GILER
A DEMO OF WIRELESS ELECTRICITY

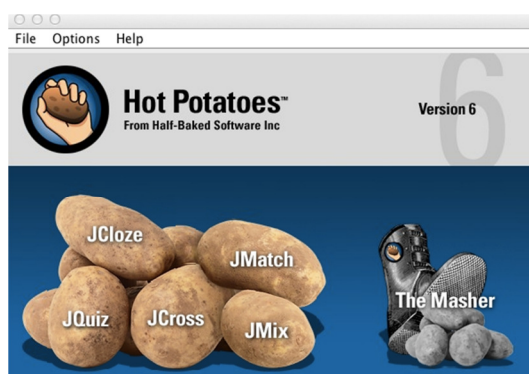

Early visions of wireless power actually were thought of by Nikola Tesla basically about 100 years ago. The thought that you wouldn't want to transfer electric power wirelessly. no one

That was the simple part, but what about a sequence of exercises made in Hot Potatoes?

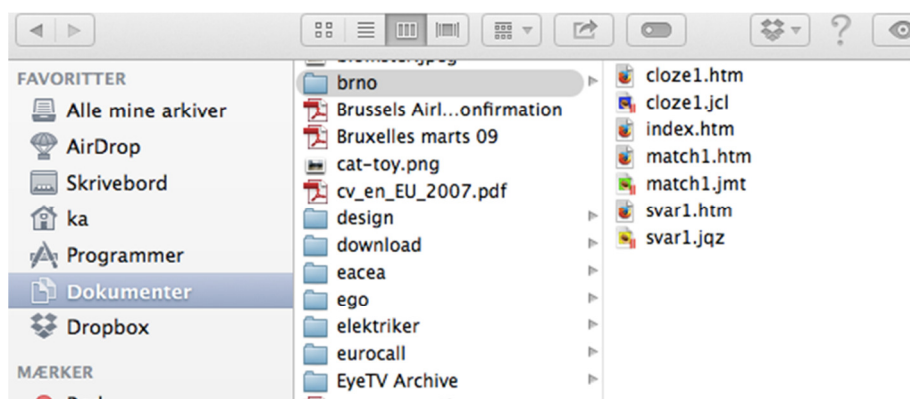

Uploading and linking to a sequence of exercises made in Hot Potatoes.

You should always save your Hot potatoes exercises in a new folder so you know where they are and have tested that they work perfectly on your computer before uploading to Clilstore

It is strongly recommended that after you have made the exercises you make use of “The Masher” in Hot Potatoes to save your files in the new folder with a menu file, which will usually be named “index.htm”

In this example I have used The Masher to make three Hot Potatoes units and the menu file, all four files now end with “.htm”. It is those files that have to be uploaded to Clilstore:

Link buttons		
Button text	WL	New Link (url or Clilstore unit number)
Work Assignment	<input type="checkbox"/>	file:ideer.docx
	<input type="checkbox"/>	
	<input type="checkbox"/>	
	<input type="checkbox"/>	
Files... Upload and manage files attached to this unit...		

As in the Word file example go to edit and click “Files...”

Then repeat the steps below for all the files one by one; you can only upload one file at a time to Clilstore.

Manage files attached to Clilstore unit 2206

Rename or delete existing files

File (you can edit its name here to change it) View Delete

ideer.docx

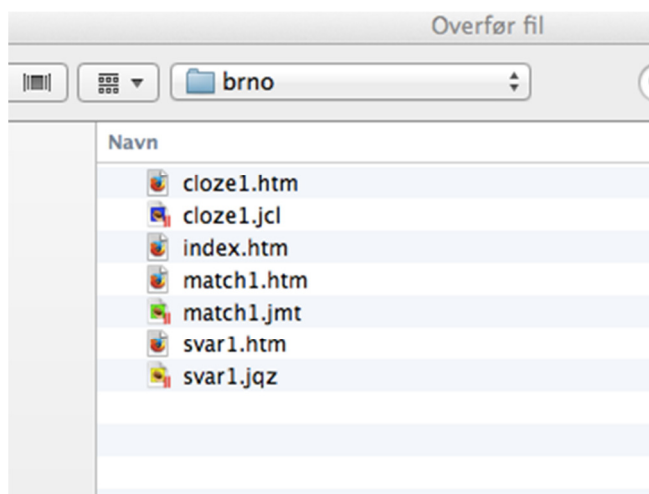

Save any name changes

Upload a new file

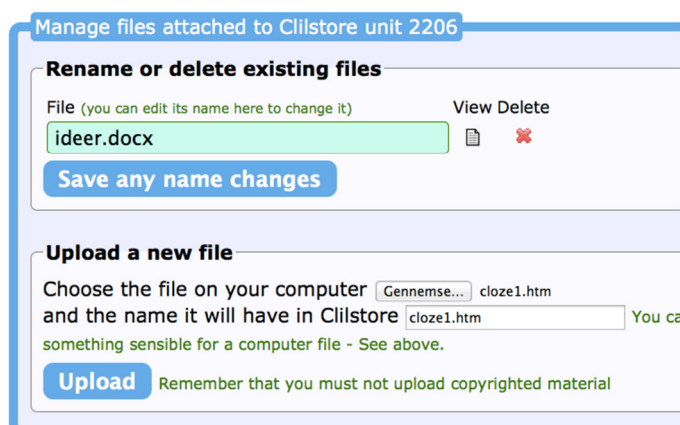

Choose the file on your computer Gennemse... Ingen fil valgt.

Upload Remember that you must not upload copyrighted material

Click the button for “Choose the file on your computer”

Select one of the files ending with “.htm” and click “Open”

Manage files attached to Clilstore unit 2206

Rename or delete existing files

File (you can edit its name here to change it) View Delete

ideer.docx

Save any name changes

Upload a new file

Choose the file on your computer Gennemse... cloze1.htm

and the name it will have in Clilstore cloze1.htm You can choose something sensible for a computer file - See above.

Upload Remember that you must not upload copyrighted material

Click Upload (but in the case of Hot Potatoes exercises you should NOT rename a file as that will ruin the menu)

Repeat the above until all (in this case four .htm files) have been uploaded

Manage files attached to Clilstore unit 2206

Rename or delete existing files

File (you can edit its name here to change it)	View	Delete
cloze1.htm		
ideer.docx		
index.htm		
match1.htm		
svar1.htm		

[Save any name changes](#)

Upload a new file

Choose the file on your computer Ingen fil valgt

[Upload](#) Remember that you must not upload copyrighted material

Clilstore Unit 2206 [Edit unit](#)

Click “Edit unit” after uploading all the .htm files

Wires suck, they really do. Think about it. Whether that's you or the wires, batteries suck too. And they really, really do. Do you ever wonder how they are built. This is what happens. They fall apart, they disintegrate, at 2:10

p

Link buttons

Button text	WL	New Link (url or Clilstore unit number)
Work Assignment	<input type="checkbox"/>	<input type="checkbox"/> file:ideer.docx
	<input type="checkbox"/>	<input type="checkbox"/>
	<input type="checkbox"/>	<input type="checkbox"/>
	<input type="checkbox"/>	<input type="checkbox"/>

[Files...](#) Upload and manage files attached to this unit...

Language

Finally it is time to link to the menu file titled “index.htm”

Link buttons

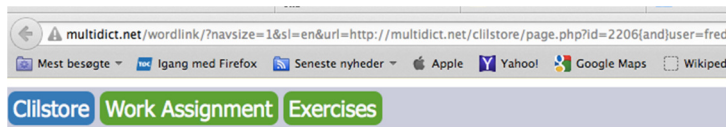

Button text	WL	New Link (url or Clilstore unit number)
Work Assignment	<input type="checkbox"/>	<input type="checkbox"/> file:ideer.docx
Exercises	<input type="checkbox"/>	<input checked="" type="checkbox"/> file:index.htm
	<input type="checkbox"/>	<input type="checkbox"/>

Type in some text in the green box

Type in “file:index.htm”

I have chosen to open the Hot Potatoes exercises in a new tab/window by clicking the “New” box

Finally click “Save Unit” and:

A demo of wireless electricity

The unit now links to the Word file and a menu with the Hot Potatoes exercises:

- [Skriv de manglende ord i teksten](#)
- [Find de halvdele som hører sammen](#)
- [Find det rigtige svar](#)

You can learn about Hot Potatoes from the Hot Potatoes website:

<https://hotpot.uvic.ca/> and watch some demo videos from:

<http://languages.dk/pools-3/index.html#Pools-3> [Do It Yourself videos](#) BUT the demo videos do not show the use of “The Masher” which produces the menu file.
